

Dip & Spin™

Urine Dipstick/Microscopics Control

- Two controls in one
- Liquid, made with real human urine
- 18 month unopened and open vial stability when stored at 2-8 C*

Analytes*

Bilirubin	Creatinine	Glucose	Ketones	Microalbumin	pH	Red Blood Cells	Urobilinogen
Blood	Crystals	hCG	Leukocytes	Nitrite	Protein	Specific Gravity	White Blood Cells

*Refer to the package insert of currently available lots for specific analyte and stability claims

How much better can it get? We craft Dip&Spin to be our most complete urinalysis control – one bottle, two controls. And easy-to-use, squeeze bottles make dispensing outrageously simple. We include values for microscopic measurements and all dipstick analytes plus microalbumin and creatinine; and qualitative results for hCG early pregnancy detection test methods. Dip&Spin is designed for use with most urinalysis reagent strips and standardized urinalysis systems and analyzers. It can also be used for confirmatory tests and refractometry. Take it for a spin; you'll be glad you did.

ORDERING INFORMATION:

1470-01 2 Level Set..... 4 x 120 mL
